Who we are

Baq stands for high-quality planters that are meticulously designed and expertly crafted. Available in a wide range of materials, each Baq planter has its own unique look, which makes for a highly diverse collection. Ranging from contemporary to timeless, from rugged to refined, and from bright colours to subtle minimalism. There's a planter for every plant and interior. Whichever model you choose, a Baq planter will make for a striking addition to your interior or outdoor space.

Let’s create

With innovative ideas and smart new techniques, we create surprising designs and practical accessories that make your plants pop while lifting up your interior. A Baq planter will bring out the natural beauty of your greenery, making your home an even more pleasant place to stay. The whole inspires and stimulates the creative mind.

As several of our collections are handmade and crafted from natural materials, slight variations may occur compared to the images in this brochure. We see this as a mark of authenticity, underlining the unique character of each product. Our collections continue to evolve, which means designs and specifications may be subject to change without prior notice.

basic series

The basic series stands for timeless functionality and accessible design. Crafted from durable yet lightweight materials, these planters are designed for everyday versatility, indoors or out. Their neutral aesthetic and modern lines offer a subtle complement to any space, blending seamlessly with diverse interiors and exteriors. Reliable, low-maintenance, and attractively priced, the basic series delivers effortless style for a broad audience.

Ecoline

Sola

Timeless

Sustainability brought to life in pure, versatile shapes.

basic series

Ecoline collection

Ecoline planters are made from recycled plastic. The materials originate from products that have already served their purpose in life, such as old car bumpers, phones, keyboards, computers and vacuum cleaners. These products are shredded, heated and moulded into a new shape. This gives used products a second life. The planters are available in all RAL colours* and with handy accessories.

*With the exception of the mother-of-pearl and fluor colours.

Soft curves and lasting colour come together in quiet elegance.

basic series

Sola collection

The Sola collection is characterised by its elegant, rounded shapes and soft appearance. The colour is integrated into the material rather than applied as a coating, creating a durable and refined finish. The collection is available in two colours. The planters are UV- and frost-resistant and feature a drainage hole, making them suitable for both indoor and outdoor use.

Available from January 2027

Sleek in design, endlessly versatile and truly timeless.

basic series

Timeless collection

The Timeless collection looks great anytime and everywhere. Thanks to the sleek design, the planters suit any type of interior. Moreover, they are available in any RAL colour*, so that you can combine them perfectly with other colours in the interior. The Timeless collection is available with several handy accessories that make it easier to assemble the planters.

*With the exception of the mother-of-pearl and fluor colours.

Algar
collection

With the coarse surface structure, the planters from the Baq Algar collection have a robust appearance reminiscent of rock formations and natural stone. This makes each planter unique. Baq Algar is available in three special colours. The planters feature a drainage hole and are both frost- and UV-resistant. This makes this collection suitable for outdoor and indoor use. For indoor use, we recommend using a liner to make the planter waterproof.

Earthy textures and vibrant hues echo the spirit of the elements.

premium series

Atlas collection

The Atlas collection is characterised by a robust and distinctive surface texture reminiscent of coarse sand grains. Each planter has a unique colour with vibrant nuances. These planters are made of fiberstone and are suitable for both indoor and outdoor use. Thanks to their UV- and frost-resistance, they can remain outside all year round. The Baq Atlas planters are equipped with a drainage hole, so for indoor use, we recommend using a liner to make the planters watertight.

like drifting dunes,
a reflection of
nature's movements.**

premium series

Dune
collection

The Dune collection has a beautiful surface texture reminiscent of the dynamic lines found in windblown sand dunes. Crafted from lightweight fibreclay, these planters are easy to move around. Thanks to their UV-resistant properties and drainage hole, they can be placed outdoors with ease. The Dune collection is fire retardant, making it a safe choice for indoor applications. For indoor use, a liner should be used.

Crafted from forest debris, bringing the quiet poetry of nature indoors.

premium series

Naturescast® collection

The planters from the Naturescast® collection have a natural look and are made from rescued agro-forest debris such as dry leaves, twigs, and bark. These are bound together with a proprietary water-based binder, making the material eco-friendly, biodegradable, and recyclable. The material is also Cradle to Cradle® certified, ensuring it meets the highest standards for sustainable product design.

Recycled paper, sculped into new distinctive shapes.

premium series

Nucast® collection

The Nucast® planters are made from recycled paper composite, a very practical alternative to traditional materials such as stone and metal. Nucast® is a lightweight material that can be used to mimic most natural textures. It's also easy to recycle, making these planters an excellent sustainable choice.

Opus
collection

The Opus collection is made of lightweight polystone with a special surface structure that resembles hammered metal. Thanks to a special finishing technique, the material of the planter can hardly be distinguished from real metal. Several models are equipped with a waterproof liner, for others we recommend using a Baq liner to make the planters watertight.

Stone-like spirit, timeless strength, effortless grace.

premium series

Polystone collection

The planters in our Polystone collection get their authentic stone look from polystone, a handcrafted material composed of natural crushed limestone, dry-stamped into a mould to replicate the natural process of limestone formation. While this material is externally similar to natural stone, it's also surprisingly lightweight. A number of the models come with a liner, for the other models we recommend using a Baq liner to make the planter waterproof.

Texture that captures the dance of falling rain.

premium series

Raindrop collection

The Raindrop collection is characterised by the special texture to which it owes its name, as these planters always look like they've just been hit by a fresh rain shower. The Raindrop models are lightweight and made of fibreclay. All planters are frost and UV-resistant and are fire retardant, making them a safe choice for interior applications. The presence of a drainage hole in the bottom ensures that excess water can easily drain away. Use a Baq liner to make the planter waterproof.

Refined simplicity, enriched by subtle texture.

premium series

Riven collection

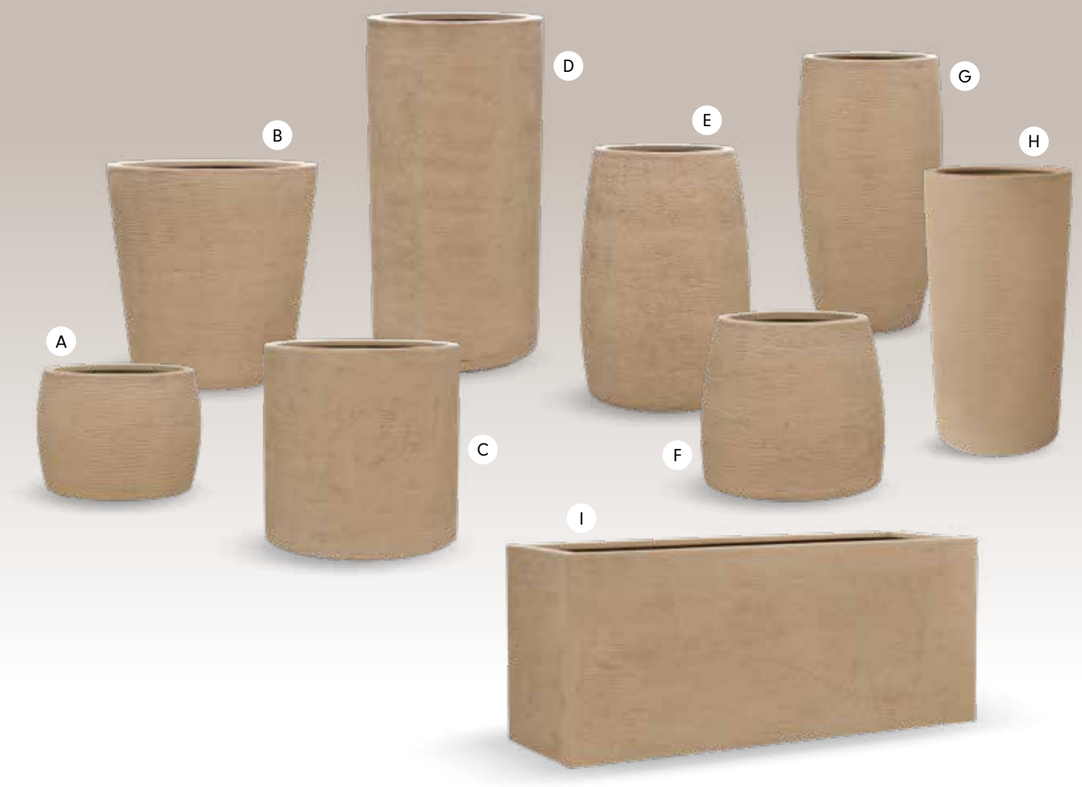

The Riven collection combines clean, contemporary shapes with a subtle horizontal texture. The collection is available in two colours and includes several models with a raised base, making them easier to plant. The planters are UV- and frost-resistant and feature a drainage hole, making them suitable for both indoor and outdoor use.

Soft curves, defined by a serene presence.

premium series

Seren collection

The Seren collection is characterised by its distinctive rounded shapes, which create a harmonious appearance. The planters are crafted from polystone, a blend of plastic and ground limestone, that resembles natural stone while remaining surprisingly lightweight. As a result, the Seren collection is both practical and aesthetically refined.

Luxury and playfulness united in a refined terrazzo finish.

premium series

Terrazzo collection

The Terrazzo collection is characterised by a unique finish. The planters have a luxurious look due to the effect of crushed stone. Because the collection is made of fiberstone, the planters are lightweight but also very strong. The planters are UV- and frost-resistant and feature a drainage hole, making them suitable for outdoor use. When used indoors, we recommend using a Baq liner to make the planters waterproof.

Bold vertical lines create a symphony of rhythm and shadow.

premium series

Vertical Rib collection

The Vertical Rib has a beautiful ribbed surface with a wide edge. The planters are made from fibreclay, which has the same appearance as cement but is much lighter and therefore easier to move around. The Vertical Rib collection is UV-resistant, so you can place the planter indoors (with a liner) or outside. As the planters are fire retardant, the collection is a safe choice for indoor applications.

luxe series

The luxe series is defined by its use of exceptional materials and meticulous craftsmanship. Each planter features refined finishes, such as premium ceramics, natural textures, or artisanal coatings, that lend a sense of understated luxury. Carefully made for discerning interiors and projects, these planters stand out through quality and elegant detailing. The luxe series brings modern sophistication and a tactile richness to every space.

Subtle colour gradients and timeless shapes evoke harmony and calm.

luxe series

Gradient collection

The Gradient planters feature a subtle, hand-sprayed colour gradient that creates a harmonious look. The models in this collection are made of polyresin, a solid material consisting of a mixture of ground stone and liquid synthetic resin. Several models feature a liner and are therefore waterproof.

Raw, artisanal and unique – each piece forged by fire.

luxe series

Lava collection

The Lava collection is distinctive because of its remarkable surface, which is created by a special technique that we call ‘scratch off’. These ceramic planters are made in the traditional way using wood fired ovens, which makes each product unique. The planters have a drainage hole and are therefore suitable for outdoor use. For indoor use, we recommend a liner to make the planter waterproof. Due to the use of natural materials, the colours shown may differ from reality.

Where natural origins meet enduring design.

luxe series

Radia collection

The Radia collection combines sustainability, design and practicality. The planters are made from Radiata Pine offcuts and treated naturally using heat and steam, without the use of chemicals. This ensures a dimensionally stable, weather-resistant finish with the durability of hardwood. The collection is suitable for both indoor and outdoor use, available in various designs, and each planter comes with a liner featuring a drainage plug.

The seamless essentials behind effortless planting.

accessories

Liners

The universal Baq liners are available in different sizes and shapes, making them a perfect fit for any planter. The transparent, flexible liners are made from at least 50% recycled plastic. An extra firm rim ensures that the larger sizes retain their shape. Also, the handy cutting edges help make the liners suitable for hydroculture.
