WHAT'S THE SECRET TO BEAUTIFUL PLANTS? LECHUZA!

From lush balcony planting to stylish interior greenery – discover the secret of beautiful plants! Whether based on environmentally friendly recycled material, with added atmospheric lighting or featuring a classy slate look.

Lightweight, shatterproof and made of high-quality plastic, they will embellish your home and garden.

The entire LECHUZA range meets the high quality standards of the "Made in Germany" label. We manufacture our products using environmentally friendly processes and strive to conserve energy and resources.

The Blue Angel logo, which has been awarded to our CLASSICO Color ECO line since summer 2023, is proof of our sustainable approach to materials.

With the original LECHUZA self watering system every plant can be supplied with water according to its individual needs. In combination with our perfectly matched LECHUZA plant substrates, plants receive the optimum supply of nutrients to enable them to grow and thrive.

As a new addition to the range, we now also offer an even greater variety of peat-free special substrates using mineral formulas. Structurally stable, water-retaining and reusable, they are the ideal replacement for conventional potting soil!

Give our diverse range a try and discover the ideal combination of stylish design and optimum yet straightforward plant care. Find out about our other new products and help your customers enjoy beautiful plants that will thrive indoors and out with LECHUZA.

THE LECHUZA PRINCIPLE

PROFESSIONAL WATERING FOR EVERY TYPE OF PLANT

Plant care can be a challenge because every plant has unique requirements in terms of its location and watering needs. LECHUZA makes watering easy!

WATER ONCE, THEN SIT BACK AND RELAX!

LECHUZA has developed an intelligent self watering system inspired by nature that creates the optimal conditions for plant growth and keeps care to a minimum. Get magnificent blossoms and lush foliage even without a green thumb thanks to LECHUZA's unique principle.

WICK SYSTEM

This self watering system uses an absorbent wick to transport water and nutrients to the root of the plant. The wick system is exclusively planted with LECHUZA-PON to ensure optimal capillary action and good root aeration. Simply fill the water reservoir and the plant receives all the moisture it needs. The water level indicator reliably shows when it is time to refill the reservoir. Table planters with a wick watering system are available as an All-in-One Set with enough LECHUZA-PON for a complete planting.

STICK SYSTEM

Perfect watering for herbs and co. without any planting: Simply insert the watering stick directly into the growpot and then place it into the planter. Water is transported from the reservoir to the soil of the pot and directly reaches the roots of the plant.

PROFESSIONAL TIPS FOR PROFESSIONAL GARDENERS

THE RIGHT WATERING SYSTEM FOR EVERY TYPE OF PLANT

The secret to beautiful plants is a well-functioning watering system. But what makes the Original LECHUZA self watering system different from other systems? The answer is the optimum mix of water, substrate and plant roots.

All LECHUZA planters are supplied with the right quantity of LECHUZA-PON as a drainage layer. This layer must be used to ensure the plants are watered reliably.

The secret to a successful growing-in phase is also linked to the outstanding capillarity of LECHUZA-PON. With smaller planters in particular (up to size 30), plants with a strong root ball are supplied very quickly as the water rises. The roots grow into the moist area of the self watering system after only a short period of time.

In larger planters with a diameter of 15 inches or more, the plants only reach the moist area after a growing phase. This is why correct watering is crucial to growing success. That's where LECHUZA comes in, with reliable plant care, just as nature intended.

WATERLOGGING DOES NOT STAND A CHANCE: THE VOLUME-STABLE COMPOSITION OF LECHUZA-PON GUARANTEES EVEN WATERING OF YOUR PLANTS

Further information about the growing-in phase in LECHUZA can be found here

CAPILLARITY IN LECHUZA-PON RISING CAPACITY OF THE WATER

BOTTOM PLANTING

Natural capillarity up to approx. 5.5 inches – plants above the moist area should always be watered from above.

- ✔ Growing-in phase based on plants
- ✗ Long growing-in phase

THE LECHUZA PROMISE

WHAT MAKES OUR PRODUCTS SO SPECIAL

We make our planters according to the highest standards in terms of quality, materials and finishing so that you can enjoy our products for many years to come. Thanks to this combination, our assortment has some very unique features:

WEATHERPROOF

Hot sun, persistent rains, snowfall: Our planters can take it all. This means you can leave them outside even in harsh weather conditions and they won't fade or become porous.

UV RESISTANT

Many windows do not block UV rays and objects in front of them can fade over time in the sunlight. Our planters are UV resistant, so you can place them on windowsills without hesitation and they won't lose their color.

FROSTPROOF

All of our planters are made of durable plastic and are suitable for use even in sub-freezing temperatures. You can leave them outdoors the entire winter with no worries.

PERFECTLY BALANCED PLANT SUBSTRATES

Every plant has unique soil needs. We love plants, so we offer an entire range of different substrates that help every type of plant thrive.

SHATTERPROOF

Our planters are so rugged that they won't shatter, crack or break if they ever tip over.

EASY TO CLEAN

LECHUZA planters are very easy to clean: All you need is a soft cloth and some water to remove fingerprints, dirt, dust, and other debris from the robust painted surface.

WATERTIGHT

Your floors, tables and surfaces stay dry: Our planters are reliably watertight. Even our outdoors planters come with a drain plug that can be inserted for indoor use.

PRACTICAL ACCESSORIES

We want our planters to be as simple and easy to use as possible and fit even better into your customers' living environment. With this in mind, we offer complementary accessories designed specifically for our various planter shapes and sizes. This adds real value to your LECHUZA range!

LECHUZA QUALITY

ONLY THE HIGHEST QUALITY PLASTICS

Premium materials, low-solvent paints and years of experience in plastics molding give LECHUZA products their one-of-a-kind quality. Thanks to our technical expertise, our planters and furniture are exceptionally robust and made to last for many years.

We have been committed to quality-controlled production right here in Germany ever since our operations began in 2000. We are still headquartered in the Middle Franconian town of Zirndorf and manufacture our planters and furniture in nearby Dietenhofen to ensure consistent product quality at the highest level.

Quality and sustainability combined in one planter. The new CLASSICO Color ECO line is certified with the Blue Angel. The German government's eco-seal is awarded to environmentally sound products.

CARING FOR THE ENVIRONMENT

HAPPINESS IS A GREEN THUMB!

Protecting the environment and conserving resources is a part of LECHUZA's DNA. That's why the sustainable, responsible handling of the raw materials is a key focus. All planters are 100% recyclable and made in Germany. The black planter liners and many accessories are already made of 100% recycled PIR plastic (post-industrial recyclate). The ECO Line is now introducing the very first planters that are made entirely of 100% recycled material.

We also care about sustainability; a large part of our production water comes from cisterns and we are constantly looking for ways to reduce our energy consumption. And in an effort to create a sustainable value chain, we include our suppliers and distributors in our environmental concept.

THE LECHUZA LOOK

AWARD-WINNING DESIGN MADE IN GERMANY

Harmonious shapes, elegant finishes, exciting surfaces – these are the characteristics of the unmistakable LECHUZA look. Our innovative ideas blend useful features with aesthetic design, reinforcing our role as a pioneer in the market.

“Form follows function”

At LECHUZA, design and function are equally important – without any compromises. Following this creative approach we have succeeded year after year in inspiring the industry and winning over critics.

We have already received over 25 awards for the unique design of our planters.

- Not pre-fertilized
- Ideal drainage layer for planters without the LECHUZA self watering system
- 6 liter | 12 liter

TERRAPON FOR ALL OUTDOOR AND POTTED PLANTS

- Organic mineral plant substrate
- Pre-fertilized for 6 to 8 months
- Optimal root aeration – prevents waterlogging
- 6 liter | 12 liter | 30 liter

VEGGIEPON FOR ALL VEGETABLE PLANTS AND HERBS

- Organic mineral plant substrate
- Pre-fertilized for 6 to 8 months
- With vegetable carbon for improved soil fertility
- 6 liter | 12 liter

CITRUSPON OPTIMAL FOR ALL CITRUS PLANTS

- Organic mineral plant substrate
- Pre-fertilized for 6 to 8 months
- Includes calcium for an abundant harvest
- 12 liter | 25 liter

UNIPON FOR OUTDOOR AND BALCONY PLANTS

- Universal soil with mineral content
- Pre-fertilized for 3 months
- Promotes lush seasonal growth
- 40 liter

FERTILIZERS AS FAR AS THE EYE CAN SEE

FOR HEALTHY GROWTH AND A RICH, TASTY HARVEST, MANY PLANTS NEED A VERY SPECIFIC MIX OF MINERALS AND TRACE ELEMENTS. THE MINERAL LECHUZA FERTILIZER ASSORTMENT COVERS EVERY PLANT NEED.

PERFECT LEAF
FOR GREEN FOLIAGE AND HOUSEPLANTS

- Liquid and slow-release fertilizer
- For healthy growth and strong plants
- High-quality nutrient formulation

PERFECT PALM
FOR PALMS AND MEDITERRANEAN PLANTS

NEW FOR 2024

- Liquid and slow-release fertilizer
- For green leaves and vigorous growth
- High-quality nutrient formulation

PERFECT FLOWER
FOR ALL FLOWERING PLANTS

- Liquid and slow-release fertilizer
- For impressive and long-lasting flowers
- Fast acting

PERFECT CACTUS
FOR CACTI AND SUCCULENTS

NEW FOR 2024

- Liquid fertilizer
- Strengthens the tissue and promotes resilience
- High-quality nutrient formulation

PERFECT VEGGIE
FOR ALL VEGETABLE PLANTS AND HERBS

- Liquid and slow-release fertilizer
- For healthy growth and an aromatic harvest
- 100% natural and vegan

PERFECT CITRUS
FOR ALL CITRUS PLANTS

NEW FOR 2024

- Liquid and slow-release fertilizer
- For intensive flowering and fruit production
- 100% natural ingredients

SLOW-RELEASE FERTILIZER
WITH PRACTICAL DOSING CAP
FOR 1, 4 AND 8 LITERS

DIFFERENCES BETWEEN SLOW-RELEASE FERTILIZER AND
LIQUID FERTILIZER

Slow-release fertilizer

The slow-release fertilizer takes effect in the water reservoir. The special encapsulation technology continuously releases nutrients over a period of six to eight months, making it the perfect choice for use in water reservoirs in LECHUZA planters. To use, simply add 3g per liter of water to the water reservoir using the practical dosing cap.

PERFECT ORCHID
SPECIALLY DEVELOPED FOR ORCHIDS

- Liquid fertilizer and leaf shine spray
- Promotes root growth and stimulates flowering
- For perfect dosing

Liquid fertilizer

The liquid fertilizer works particularly quickly and supplies the plants with the right amount of nutrients every time they are watered. Add 1 pump per liter to the water before watering the plants as usual. Also suitable for plants in conventional planters.

LECHUZA-PON FOR ALL HOUSEPLANTS

LECHUZA-PON mineral plant substrate is the heart of the original LECHUZA self watering system. It provides plants with optimal root aeration and **stores water and nutrients**, releasing them to plants individually as needed. Waterlogging doesn't stand a chance thanks to the excellent drainage capability of the mineral substrate.

LECHUZA-PON is made from high-quality zeolite, washed pumice **and lava and remains volume-stable** thanks to its special composition. This is because, compared with soil, PON can neither be compressed nor form clumps. The substrate is based on a purely mineral formula, so it is not vulnerable to fungus or pests. This makes it ideally suited for people with allergies.

LECHUZA-PON is enriched with LECHUZA PERFECT LEAF slow-release fertilizer, which reliably supplies houseplants with all of the nutrients they need for 6 to 8 months.

ALL OF THE ADVANTAGES AT A GLANCE

- Suitable for all houseplants
- Purely mineral
- Pre-fertilized for 6 to 8 months
- Excellent drainage properties prevents waterlogging
- Stores nutrients and releases them as required
- Prevents pest infestation and mold growth

LECHUZA-PON XXL THE EXPERT IN BIG PLANTERS

The **extra coarse**, purely mineral plant substrate LECHUZA-PON XXL is perfect for big planters and gives larger potted plants the stability they need. The high volume stability means that the substrate does not compress and retains its air-permeable structure. The mineral substrate comprises pumice, lava and zeolite, which function as water and nutrient reservoirs supplying the plant as needed. Waterlogging is avoided and root rot is prevented thanks to the structurally stable composition.

For nutrient supply, the substrate is also pre-fertilized for 6-8 months. **The plant substrate is recommended for all permanently potted large planters, indoors and outdoors.** LECHUZA-PON XXL can also be used as an attractive decorative layer thanks to its coarse structure.

ALL OF THE ADVANTAGES AT A GLANCE

- Designed for continuous use indoors and out
- Purely mineral
- Extra coarse grains – ideal for large plants and planters
- Pre-fertilized for 6 to 8 months
- Volume-stable - for stable and sturdy plants, substrate does not compress
- Suitable for complete planting or use as an ornamental layer

CITRUSPON

OPTIMAL FOR ALL CITRUS PLANTS

The plant substrate for Mediterranean flair! CITRUSPON, with its **extra portion of natural calcium**, helps **guarantee a rich citrus harvest and healthy plants**. The organic mineral potting substrate is suitable for all citrus plants. It has excellent drainage properties and ensures optimum root aeration, avoiding waterlogging. In the interests of protecting our natural environment, the substrate is peat-free. CITRUSPON is particularly volume-stable and gives plants stability and robustness. It also does not get compressed.

The special substrate is pre-fertilized with special LECHUZA citrus fertilizer for 6 to 8 months and enriched with red lava for added heat retention. This gives CITRUSPON its Mediterranean look to complement the plants. Lemons, oranges and other Mediterranean plants are ideally cared for, resulting in green foliage and juicy fruits.

ALL OF THE ADVANTAGES AT A GLANCE

- Suitable for all citrus plants
- Organic mineral potting substrate
- Pre-fertilized for 6 to 8 months
- Extra calcium promotes fruit production, iron contributes to green leaves
- Red lava retains heat and creates a Mediterranean look

PALMPON

FOR PALMS AND MEDITERRANEAN PLANTS

The purely mineral organic plant substrate PALMPON optimally controls the water supply for palms and other tropical plants, and supports root aeration. It is suitable for all palms and Mediterranean plants. **The plant substrate is enriched with black lava, which helps with heat retention and looks particularly striking.** This special composition increases air circulation in the substrate and prevents waterlogging. This also results in stable and robust plants.

PALMPON is also enriched with extra potassium and iron to stimulate growth. PALMPON is pre-fertilized for 6 to 8 months with the special LECHUZA palm fertilizer, so that the plants are optimally supplied with all the nutrients they need, for vital plants and intensive green foliage.

ALL OF THE ADVANTAGES AT A GLANCE

- Suitable for all palms and Mediterranean plants
- Organic mineral potting substrate
- Pre-fertilized for 6 to 8 months
- Volume-stable – for stable and sturdy plants
- Extra potassium and iron for fast, healthy growth
- Black lava retains heat

CACTUSPON FOR ALL CACTI AND SUCCULENTS

Making the prickly housemates feel completely at home! Cacti and succulents come from dry regions and need a plant substrate with increased drainage properties.

CACTUSPON is a purely mineral substrate with special drainage properties that ensure optimum root aeration. The particularly fine-grained structure prevents waterlogging and root rot. Enriched with pumice, lava and zeolite, the special substrate ensures optimal development of cacti and succulents. Due to its mineral composition, it is not vulnerable to pests and also prevents mold growth. CACTUSPON is particularly volume-stable and provides stability in the planter. It is peat-free, not pre-fertilized, low in nutrients and suitable for all types of cacti and succulents as a result.

BASICPON FOR DELICATE PLANTS AND PROPAGATION

To develop optimally, sensitive plants and delicate cuttings need a special plant substrate. BASICPON is a pure mineral plant substrate, which is **exceptionally well suited to delicate plants and the cultivation of cuttings due to the absence of fertilizer**. The peat-free plant substrate is volume-stable and provides the delicate roots with sufficient support in the planter. The optimum root aeration also promotes growth and prevents waterlogging. Thanks to purely mineral components, fungus gnats and other pests are kept at bay. Mold growth is also prevented, making BASICPON suitable for people with allergies.

BASICPON can be used for complete planting or can be mixed with potting soil as a soil improver.

ALL OF THE ADVANTAGES AT A GLANCE

- Suitable for all cacti and succulents
- Purely mineral
- Not pre-fertilized, for need-based fertilizing
- Volume-stable - for stable and sturdy plants, substrate does not compress
- Especially fine grains for improved drainage. Prevents waterlogging and root rot.
- Prevents pest infestation and mold growth

ALL OF THE ADVANTAGES AT A GLANCE

- For sensitive plants and cultivation
- Purely mineral
- Not pre-fertilized, for need-based fertilizing
- Rapid growth thanks to optimum root aeration
- Stores nutrients and releases them as required
- Prevents pest infestation and mold growth
- Particularly suitable for people with allergies

ORCHIDPON SPECIALLY DEVELOPED FOR ORCHIDS

ORCHIDPON is a special substrate that offers ideal conditions for orchids, contributing to magnificent flowers, and was designed especially for these sophisticated tropical natives. It consists of organic and mineral components and is peat-free in the interests of preserving the natural world.

The blended humic matter reduces the pH value, thereby creating a slightly acidic environment as preferred by orchids. This humic matter also strengthens the roots and improves the soil structure.

The nutrients included in the substrate, which are supplied to the plant for approx. 6 months, promote root growth and stimulate flowering. These also help ensure that the flowers last. **The outstanding root aeration and first-rate drainage properties protect against waterlogging, helping the orchids to thrive.**

PROVEN QUALITY
IN A NEW DESIGN

PACKAGE SIZES:
3 AND 6 LITER

BLACKSTONEPON DESIGNPON IN BLACK

BLACKSTONEPON puts conventional potting soil in the shade: **The mineral plant substrate BLACKSTONEPON has an exceptional dark color due to the addition of natural vegetable carbon and black lava. It is the perfect alternative to conventional potting soil because it is structurally stable**, supports root aeration and perfectly controls the water supply. It is therefore in no way inferior to LECHUZA's conventional planting substrates: pumice, lava and zeolite ensure excellent drainage and water storage capacity so that plants are reliably supplied with enough water.

BLACKSTONEPON comes pre-fertilized, so plants receive the nutrients they need right from the start. BLACKSTONEPON can be used for all houseplants and for complete planting or as a decorative layer.

BLACKSTONEPON is the design substrate for particularly discerning plant lovers.

NEW DESIGN SUBSTRATE

PACKAGE SIZES:
6, 12 AND 18 LITER

ALL OF THE ADVANTAGES AT A GLANCE

- Suitable for all types of orchid
- Organic mineral plant substrate
- For magnificent orchids
- Promotes root growth
- Pre-fertilized for 6 to 8 months
- Optimum supply of nutrients stimulates flowering
- Humic matter reduces pH level

ALL OF THE ADVANTAGES AT A GLANCE

- Suitable for all houseplants
- Mineral plant substrate
- Exceptional dark color
- Pre-fertilized for 6 to 8 months
- Optimum root aeration and excellent drainage properties
- Vegetable carbon improves soil fertility
- Suitable for complete planting or use as an ornamental layer

TERRAPON

FOR ALL OUTDOOR AND POTTED PLANTS

TERRAPON is an organic, mineral plant substrate, making it the ideal substrate for all potted plants and particularly suited for use outdoors. **The peat-free substrate combines humus with mineral components, ensuring optimum root aeration in the planter.** These drainage properties are especially important for plants situated outdoors as it prevents waterlogging and root rot.

Because the substrate is particularly volume-stable, even lush plants are kept stable and upright in the planter. **TERRAPON is also pre-fertilized, which means that the potted plants receive a continuous supply of nutrients for 6 to 8 months.** Thanks to these nutrients, your outdoor plants will continue to grow and flower.

VEGGIEPON

FOR ALL VEGETABLE PLANTS AND HERBS

Urban gardening made easy – with VEGGIEPON. **The special substrate has been specifically developed to help gardeners grow their own vegetables and herbs. In the interests of protecting our natural environment, the substrate is peat-free and only contains natural ingredients.** It is also 100% vegan and does not contain any animal products. The nutrient-dense plant substrate is enriched with **completely vegan fertilizer and premium vegetable carbon for maximum yields and fertile soil.** The **extremely fertile composition ensures a bountiful harvest just as nature intended.** The organic mineral culture substrate provides optimum root aeration, preventing waterlogging and root rot.

ALL OF THE ADVANTAGES AT A GLANCE

- Suitable for all outdoor and potted plants
- Organic mineral potting substrate
- For opulent flowers
- Pre-fertilized for 6 to 8 months
- 100% peat-free to protect nature
- Volume-stable – the substrate does not compress
- High mineral content for optimum root aeration

ALL OF THE ADVANTAGES AT A GLANCE

- Suitable for growing vegetables and herbs
- Organic mineral culture substrate
- For a rich harvest and juicy vegetables
- 100% vegan, no animal products
- Pre-fertilized for 6 to 8 months
- Vegetable carbon improves soil fertility

MONOPON

THE GREAT ALL-ROUNDER

The purely mineral substrate MONOPON is **100% natural pumice** and ensures optimum root aeration and sufficient air circulation in the planter when used as a drainage layer in conventional planters without a LECHUZA self watering system. **As an environmentally friendly alternative to expanded clay, MONOPON forms the first layer in the planter, protecting against waterlogging and root rot.** The natural pumice stores moisture, releasing it back to the roots as needed. MONOPON can be used for complete planting in place of conventional potting soil. As well as being used as a drainage layer, MONOPON can also be added to potting soil to loosen it and for aeration. The substrate is not pre-fertilized, so that nutrients can be supplied as needed making it universally suitable for all plants.

PACKAGE SIZES:
6 AND 12 LITER

UNIPON

FOR OUTDOOR AND BALCONY PLANTS

UNIPON helps to grow colorful flowers and beautiful shrubs. The universal soil is a versatile soil for balcony plants, herbs and other outdoor plants. **Its loose and light texture means the roots are optimally aerated, which is what makes the universal soil suitable for year-round use outdoors.** Enriched with a combination of mineral and organic components, UNIPON is a soil improver, helping to ensure that plants are strong and healthy. This effect is reinforced by the pre-fertilized composition, supplying the plants with sufficient nutrients for around 3 months. The mineral component also means that UNIPON can be used to improve potting soil. In the interests of protecting our natural environment, the universal soil is peat-free.

PACKAGE SIZES:
40 LITER

ALL OF THE ADVANTAGES AT A GLANCE

- Suitable for all types of plant
- Purely mineral
- Suitable as a drainage layer for conventional planters without the LECHUZA self watering system
- Also suitable for complete planting or as a soil improver
- The sustainable alternative to expanded clay
- Not pre-fertilized, for need-based fertilizing
- Good drainage properties, prevents waterlogging

ALL OF THE ADVANTAGES AT A GLANCE

- Suitable for all outdoor and balcony plants
- Universal soil with mineral and organic components
- For lush seasonal growth
- Suitable for complete planting to improve garden soil
- Pre-fertilized for 3 months
- Loose and light

CLASSIC BALCONERA BRACKETS
FLEXIBLE DESIGN FOR OPTIMAL POSITIONING

BRACKET IS PRACTICALLY INVISIBLE

DUO BALCONERA BRACKETS
NEW FOR 2025
TWO FOR ONE: SPACE FOR TWICE AS MANY PLANTERS

ALSO SUITABLE FOR BALCONIES
WITHOUT STRUTS

WALL BALCONERA BRACKETS
NEW FOR 2025
SAD BALCONY WALLS GET A MAKEOVER

A SECURE FIT EVEN ON WALLS

BALCONERA brackets

Perfectly set-up: Using the different BALCONERA brackets, the planters can be easily attached to railings or walls.

CLASSIC BALCONERA brackets The sturdy brackets can be adjusted quickly and easily on the railing using the individually adjustable straps. The brackets are then practically invisible under the BALCONERA planter.

NEW FOR 2025

BALCONERA DUO brackets

With the new double brackets, balcony planters can be positioned indoors and outdoors at the same time. As well as this upgrade, the DUO balcony planter can also be used to fix the planters to a balcony wall without bracing. But the DUO brackets can also be mounted on narrow, flat or round railings thanks to special adapters available separately. The special double brackets which are infinitely adjustable from 2.9 to 4.3 inch fit securely to the railing or wall, and can be mounted quickly.

NEW FOR 2025

BALCONERA DUO adapter set

These adapters are needed to attach the DUO brackets to narrow, flat or round railings. The adapter set prevents the double holder from slipping out of position on the railing and holds the planters securely. The adapter is suitable for railing lengths of 1.1 to 2.4 inch.

NEW FOR 2025

BALCONERA WALL brackets

No railing? No problem! The BALCONERA WALL brackets enable you to mount your BALCONERA planters even on balconies that have balustrades rather than railings. They can be used to brighten up sad balcony walls up to a maximum width of 11 cm. The bracket is simply placed on the wall and the width individually adjusted. The brackets can no longer be seen at the front once the planter is placed on top.

BALCONERA extension brackets

The BALCONERA extension brackets enable you to mount your BALCONERA planters even on balcony railings with large rung spacings. The extension fits to the balcony brackets in the form of a cross brace, ensuring secure fixing to any balcony.

TECHNICAL DETAILS

BALCONERA CLASSIC brackets / 4.5×18×19 cm / 1.7×7×7.5 inch

BALCONERA extension brackets 40/50 / 1.9×38.8×5.5 cm / 0.7×15.5×2.2 inch
