About Nieuwkoop Europe

Nieuwkoop Europe is the fulfilment partner for the green sector and a leading international company in the interior landscaping market and related supply chain.

The extensive range of plants and planters find their way to mostly business projects via interior landscapers, architects, exporters, web shops, florists and other green resellers.

As your fulfilment partner, we offer you not only a complete assortment, but also custom-made products and services and full logistic support.

Exclusively available at Nieuwkoop Europe

The Wave and New Wave collections consist entirely of special made items that are exclusively obtainable at Nieuwkoop Europe. Both collections are made of Ficonstone, a mixture of fibreglass, cement, sand and crushed stone. This makes the planters very strong and relatively lightweight.

In addition, the Mineral Collection in the color Travertine Rustic Antique (87) is only available at Nieuwkoop Europe.

The Mineral, Wave, and New Wave planters are suitable for indoor and outdoor use.

Material specifications

Fiberstone

The fiberstone pots of Pottery Pots consist of 58% finely crushed stones and the remaining part is glass fiber. Stone is of course a hard product, what makes the pots really firm and high of quality. Therefore, fiberstone planters, flower pots and pots last a long time. Due to the glass fiber, the pots are lightweight and easy to move. That, in combination with the fact that fiberstone is easy to maintain, makes the pots truly user-friendly.

Additionally, fiberstone can survive all kinds of weather conditions. Frost, rain or sun, fiberstone can handle it. Fiberstone planters look good in every environment.

Lightweight

Due to the fiberstone blend, these pots are a much lighter alternative than planters that are made with clay or pure stone materials.

Material specifications

Fiberclay

Fiberclay is a combination of clay and glass fiber and is therefore called clayfibre. A fiberclay pot often has a similar appearance to a pot made of earthenware or clay, but is lighter thanks to the addition of fiberglass. Clayfibre flower pots are also extremely resistant to moisture, frost and sun, and last for many years.

Fiberclay can be compared to ficonstone, with the difference that sand and crushed stone are also added.

Rough

The Rough collection is the rebellious one of the Pottery Pots family. With its ‘less is more’ mentality, the Rough collection focuses on the tough character of the pot. The collection, with a fiberclay base, consists of modern planter models with the same characteristic finish available in two different colors.

Handmade

All of our pottery is made by hand. However, it's the Oyster collection that truly captivates with its one-of-a-kind appearance. The colors of the pots are painted on by hand in different layers for optimal depth and richness. The image above captures the first layer being applied. What a difference compared to the end result!

Bohemian

Rich in natural charm and craftsmanship, these planters capture the essence of bohemian aesthetics. They are made with an unique process; traditionally woven baskets are turned into strong planters by using ficonstone on the inside. Within the Bohemian collection, you can choose between two different looks, each with a different material on the outside that is ecologically responsible: bamboo and straw grass.

Bamboo

color code: **BB**

Crafted with a blend of fiberglass and cement on the inside of the planter, providing strength to maintain their shape. The outer layer is woven bamboo. Thoughtfully designed with a standard drainage hole, plug, and feet for optimal water drainage.

From ancient art to modern gardens

Roman pots, Roman pottery or an old Greek vase: the old influences are often seen in gardens these days. The architecture, with its majestic columns and harmonious proportions, is still a source of inspiration for contemporary designs. In the garden trends we see the Greek aesthetic is making its return.

Treasure

Inspired by the timeless beauty of ancient Egypt, this collection features classic planters characterized by elegant jug shapes and intricate rope details. These items add a touch of traditional charm to any indoor or outdoor space. Icon index

UV Resistant - Able to withstand harsh sunlight, ensuring vibrant colors and longevity, even in the brightest of spaces.

Frost Resistant - Can endure cold temperatures, making them ideal for all-year-round outdoor use.

Indoor - Elevate your interior spaces with our planters, adding a touch of greenery to any room.

Outdoor - Durable planters, built to thrive in various weather conditions, making your gardens and patios come to life.

Conscious choice - Premium quality planters provide longevity, making them a durable option for conscious buyers.

Lighweight - Due to the fiberstone blend, these pots are a much lighter alternative than planters that are made with clay or pure stone materials.

2 year warranty - We stand by the quality of our products; that's why we offer a 2-year warranty.

5 year warranty - For unparalleled durability and confidence, our planters come with a 5-year warranty.

Plant waterproof - While not suitable as vases, our planters are designed to be **plant** waterproof. Achieving 100% waterproofing with larger planters is challenging due to the handmade production process. For planters without the waterdrop icon, we recommend using plastic inserts when placed indoors.

Warranty conditions

We stand behind the quality of our planters. To keep our warranty promise, make sure to follow these conditions:

Leveling requirement:
For outdoor use, it is important that the planter is placed on a level surface. Uneven ground may compromise the stability of the planter.

Drainage holes:
Outdoor planters must be equipped with drainage holes. Proper drainage is essential to prevent waterlogged soil, root rot, and other issues that can impact the plants and planters.

Pot feet:
Elevating the planter above the ground (when using outdoors) with pot feet is essential to help with drainage, safeguarding your plants and planters from potential wa-ter-related challenges.

Non-movement policy:
Once the planter is filled with soil and plants, it should not be moved. Shifting a filled planter may lead to unintended damage.
