recyclable

WASTE MADE INTO RECYCLABLE FLOWERPOTS

ECO friendly

1 RESERVOIR

The reservoir has two functions. It stores excess water as a buffer, allowing the plant to drink when thirsty. It keeps redundant water away from the roots, preventing them from developing root rot.

2 PLUG

Are you placing the pot outside? Remember to take out the plug. After heavy rainfall, excess water can drain away via the overflow. It also makes the pot frost-proof.

INSIDE PLUG IN

OUTSIDE PLUG OUT

PLANTS LIVE LONGER IN AN ARTSTONE POT

‘Because each plant has its needs.’

Artstone pots have a special drainage system to make it as easy as possible for plants and their caretakers. The drainage system is Artstone’s own creation and development, and is truly unique! The system is invisibly integrated into the pot, and has multiple functions.

Artstone makes life for you and your plants a lot cozier. Bola, Claire, Ella, Fiona and Maud transform any space into a green paradise for you to enjoy responsibly. Each design has its own strengths but they clearly have the same genes. A modern look and sustainable all the way. The goal is to make a reliable product that is strong and future-proof, suitable for indoor and outdoor use. Artstone planters are made of recycled plastic with a touch of stone powder, and are fully recyclable themselves. In addition, the pots are colourfast and lightweight, making them easy to move.

SPECIAL DRAINAGE SYSTEM

Above all, Artstone pots have a double-sided drainage system that adds positive value to the comfort of gardening, but also to the quality of the plants. We want to point this out because we’ve noticed that when we talk about sustainability, the focus is often on materials and recycling. With Artstone, it’s all about nature.
